

**SHRI S.H.KELKAR COLLEGE OF ARTS, COMMERCE AND SCIENCE, DEVGAD.  
(SINDHUDURG)**

**S.Y.B.Sc. SEMESTER III EXAMINATION OCTOBER 2023**

**COURSE: General Chemistry I**

**COURSE CODE – USCH 301**

**TIME : 8:50 am to 11:00 am**

**MAX. MARKS: 75**

**SET 1**

**DURATION: 2.5 HOURS**

- N.B.**
1. All the questions are compulsory
  2. Figures to the right indicates full marks
  3. The use of log table/Programmable calculators are allowed.
  4. Answers for the same question should be written together.

**Q. 1) Select the correct option and complete the following statement.**

**(15)**

- 1) Gibbs free energy is .....  
a) Extensive property      b) Intensive property      c) constitutive property
- 2) For a system at equilibrium  
a)  $\Delta G = 0$       b)  $\Delta G < 0$       c)  $\Delta G > 0$
- 3) As the pressure on the system increases, its free energy  
a) Decreases      b) Increases      c) Remain same
- 4) When a reaction is carried out in liquid phase  $K_{eq}$  is designated as  
a)  $K_p$       b)  $K_c$       c)  $K_t$
- 5) The unit for cell constant is.....  
a)  $\text{cm}^{-1}$       b)  $\text{cm}$       c)  $\text{S}^{-1}$
- 6) The most efficient mode of packing of identical atoms in one layer is.....  
a) square close packing.      b) hexagonal close packing.      c) both a and b
- 7) Crystal structure of CsCl is \_\_\_\_\_  
a) FCC      b) BCC      c) HCP
- 8) The atom in the molecule of water adopts what kind of geometry?  
a) Linear      b) Tetrahedral      c) Trigonal planar
- 9) Which one of the following is correct bond angle between atoms adopting a trigonal planar geometry ?  
a)  $180^\circ$ .      b)  $120^\circ$       c)  $109.5^\circ$
- 10) The number of bonds in nitrogen molecule is .....  
a) one sigma & one pi.      b) one sigma n two pi.      c) three sigma
- 11)  $\text{SN}^1$  reactions results in .....of configuration  
a) Inversion      b) Retention      c) Both Retention and Inversion
- 12) Organolithium compounds react with alcohol to form .....  
a) Alkyl halide      b) Ethane      c) Alkane
- 13) Epoxide contain ..... Membered ring.  
a) Four      b) three      c) five
- 14) Phenols are ..... in nature.  
a) Basic      b) neutrals      c) acidic
- 15) Grignard reagent is .....

- a) organozinc      b) ethyl magnesium bromide      c) organolithium halide

**Q. 2) Attempt any THREE of the following.**

(15)

- A) Show that decrease in Helmholtz free energy at constant temperature gives maximum work. (5)
- B) Derive relation between Gibbs free energy and Helmholtz free energy (5)
- C) The free energy change accompanying a given process is -93.21 kJ at 290 K and -86.12 kJ at 305 K. Calculate the enthalpy change at 298 K. (5)
- D) Define specific conductance and equivalent conductance. How they are related with each other. (5)
- E) Explain the following with relevant equations (5)
- a) fugacity    b) activity coefficient    c) activity

**Q. 3) Attempt any THREE of the following.**

(15)

- A) Calculate the heat of formation ( $\Delta H$ ) of KF from its elements from the following data by the use of Born - Haber cycle. (5)

Sublimation energy of Potassium (S) =  $87.8 \text{ kJ mol}^{-1}$

Dissociation energy of  $\text{F}_2$  (D) =  $158.9 \text{ kJ mol}^{-1}$

Ionisation energy of  $\text{K(g)}$  (I) =  $414.2 \text{ kJ mol}^{-1}$

Electron affinity for  $\text{F (g)}$  (E) =  $-334.7 \text{ kJ mol}^{-1}$

Lattice energy KF ( $U_0$ ) =  $-807.5 \text{ kJ mol}^{-1}$

- B) (i) Explain different types of void in ionic crystal. (3)

(ii) The radii of  $\text{K}^+$  and  $\text{Cl}^-$  are  $1.13 \text{ \AA}$  and  $1.18 \text{ \AA}$  respectively. Predict the coordination number of  $\text{K}^+$  ions in KCl ionic crystal. (2)

- C) Discuss in brief the postulates and limitations of Valence band theory (5)

D) Draw a neat labelled molecular orbital energy level diagram for  $\text{N}_2$  molecule and give its molecular ES. Comment on its bond order and magnetic property. (5)

- E) Define  $\text{sp}^3$  hybridisation and on the basis of  $\text{sp}^3$  hybridisation explain the geometry of following molecule  $\text{PF}_5$ ,  $\text{SF}_4$  and  $\text{ClF}_4$ . (5)

**Q. 4) Attempt any THREE of the following.**

(15)

- A) Explain the mechanism of  $\text{SN}^2$  with suitable example. (5)

B) Discuss Elimination-Addition mechanism with suitable example (5)

C) What are Organolithium compounds? Discuss the reactions with carbonyl compound (5)

D) Explain the following with suitable example, (5)

- i) Hydration of alkenes      ii) Reduction of aldehydes & Ketones

E) Explain the following with suitable example, (5)

**Q. 5) Attempt any THREE of the following.**

**(15)**

A) What are the characteristics of electrolytic conductors?

**(5)**

B) Conductance of a 0.1 N solution of an electrolyte was found to be  $4.76 \times 10^{-3} \text{ S}$  at  $25^\circ\text{C}$ .

Calculate the cell constant, equivalence conductance, molar conductance of the solution at  $25^\circ\text{C}$ , if the electrode in the cell are 0.8 cm apart and have an area of  $0.7628 \text{ cm}^2$ .

**(5)**

C) Discuss the importance of exchange energy, shielding effect in the formation of Hydrogen molecule

**(5)**

D) i) Define terms a) crystal b) Lattice c) unit cell.

**(3)**

ii) Name seven crystal systems.

**(2)**

E) How are Grignard reagent compounds prepared? Discuss the reactions of Grignard reagent with, a) water b) alcohol c) ammonia

**(5)**

F) How is ethylene oxide prepared by the following methods?

**(5)**

a) Oxidation of olefins b) From vicinal halohydrins

**(5)**
